

Government Solutions

Did you know...

- DHS allocated \$968 Million for Public Safety Interoperable Communications (PSIC) Grants to help state and local first responders improve public safety communications during a natural or man-made disaster
- \$100 Million was allocated for FEMA's Vision Initiatives - the development of core competencies central to achieving disaster readiness, response & recovery

Sector benefits

Entrusted with the huge responsibility to ensure the safety and security of communities they serve, local, state and federal safety agencies must rely on rapid and effective communications to do their jobs. Yet, according to the industry analyst firm Datamonitor, "... first responders continue to struggle to communicate with peers in other agencies or jurisdictions as part of coordinated emergency response efforts." Critical Response Notification Systems (CRNS) address the need for improved Critical Response Performance by enabling new levels of preparedness, automation, speed and effectiveness through increased intelligence and integration across existing emergency alert systems and multiple modes of communications.

REACT! Enterprise™

REACT Systems, Inc.™, the innovator and leader in delivering global Critical Response Notification Systems (CRNS) that unify critical actions in emergencies and time-sensitive situations. REACT simultaneously delivers targeted event, location and recipient-specific verifiable communications, such as rich audio/video, SMS text and voice alerts to first responders and those at risk. As a fully scalable, client-server, enterprise solution, REACT can reach millions of users within seconds. The REACT open architecture enables interoperable automated communication with other systems and interagency coordination to reach anybody, anywhere, during crises.

- Easily integrates with existing, multi-modal communications structure within or among specific organizations
- Ensures interoperability among all participants in the response chain
- Improves the quality and relevance of communications
- Enables emergency services personnel to quickly respond, contain and mitigate emergency situations

Why choose REACT?

REACT Systems™, Inc. is the innovator and leader in delivering global Critical Response Notification Systems (CRNS) that unify vital actions in emergencies and time-sensitive situations. REACT enables health care providers, educational institutions, public safety agencies, facility operators and corporations to dramatically improve Critical Response Performance (CRP)SM by assuring incident readiness and real-time, coordinated response. REACT Systems was formerly known as Vasona Technology, Inc.
